Orientation to the summary sections:

• **High Level Summary:** This section contains a list of the key conditions/potential risk factors ordered by significance (High, Medium, Low) to help focus attention on what are generally considered the most important conditions. The more specific conditions within each key condition are listed with dates (years) of occurrence, and all are hyperlinked directly to the actual records.

• **Full Chronological Summary:** This section contains the complete summary of the records, in chronological order. It includes conditions, dates of occurrence, treatments, tests, etc. Items are color-coded to correspond with their significance rating: Red=High, Blue=Medium and Green=Low. Items in black are not considered "key conditions" but still may be important for some situations.

• **Summary by Medical Field:** This section organizes the conditions by medical field (accidents, body system, medications, etc.). This can be helpful if you have a particular interest in only one or a few conditions, allowing you to focus easily on what's most important to you.

• **Remaining bookmarks:** The bookmarks from "**Timeline**" to "**Index**" provide additional ways to search for specific items or review the medical history. Users have different preferences for how they navigate the summary. Try various methods to find the one that works best for you.

Navigating the summary for greatest efficiency and usefulness:

This is a clickable PDF! Every condition, every date, every entry is clickable....click on it and you will toggle directly to that entry in the records. This can be extremely helpful if you need to review more details about a particular condition, its treatment, etc. To return to the same place in the summary, use either 1) **Alt+Left Arrow**, or 2) from the Acrobat toolbar, choose **View > Page Navigation > Previous View.**

Bookmarks: Look for the Bookmarks icon ( ) on the left side of the page and click to open (or click **View > Show/Hide > Navigation panes > Bookmarks)**. You now have full functionality within the summary.
Bookmarks are an easy way to **navigate** through the document, allowing a "split screen" experience. The clickable items are always available while you travel and investigate the scanned documents. Each bookmark and drop-down list can be clicked to take you to that section. The bookmarks also contain helpful information including how many times the condition, procedure or medication appears in the records.

- **Timeline**: Contains all conditions and procedures ordered by date.
- **Conditions**: Contains all conditions grouped by body system and ordered by date.
- **Procedure**: Contains all procedures grouped by procedure and ordered by date.
- **Medications**: Contains all drugs ordered by date.
- **Source Documents:** Contains the original medical records that follow the summary in the PDF. Everything is there in one place.
- **Handwritten Documents & Structured Forms:** Contains all pages with handwritten notes, structured forms (forms with checkmarks, etc.) all in one place for your review. This information is not analyzed by the system.
